

**Explanation for submitting the design**

How nice that you have chosen to have socks made with us. We are happy to explain how you can best submit your design to us.

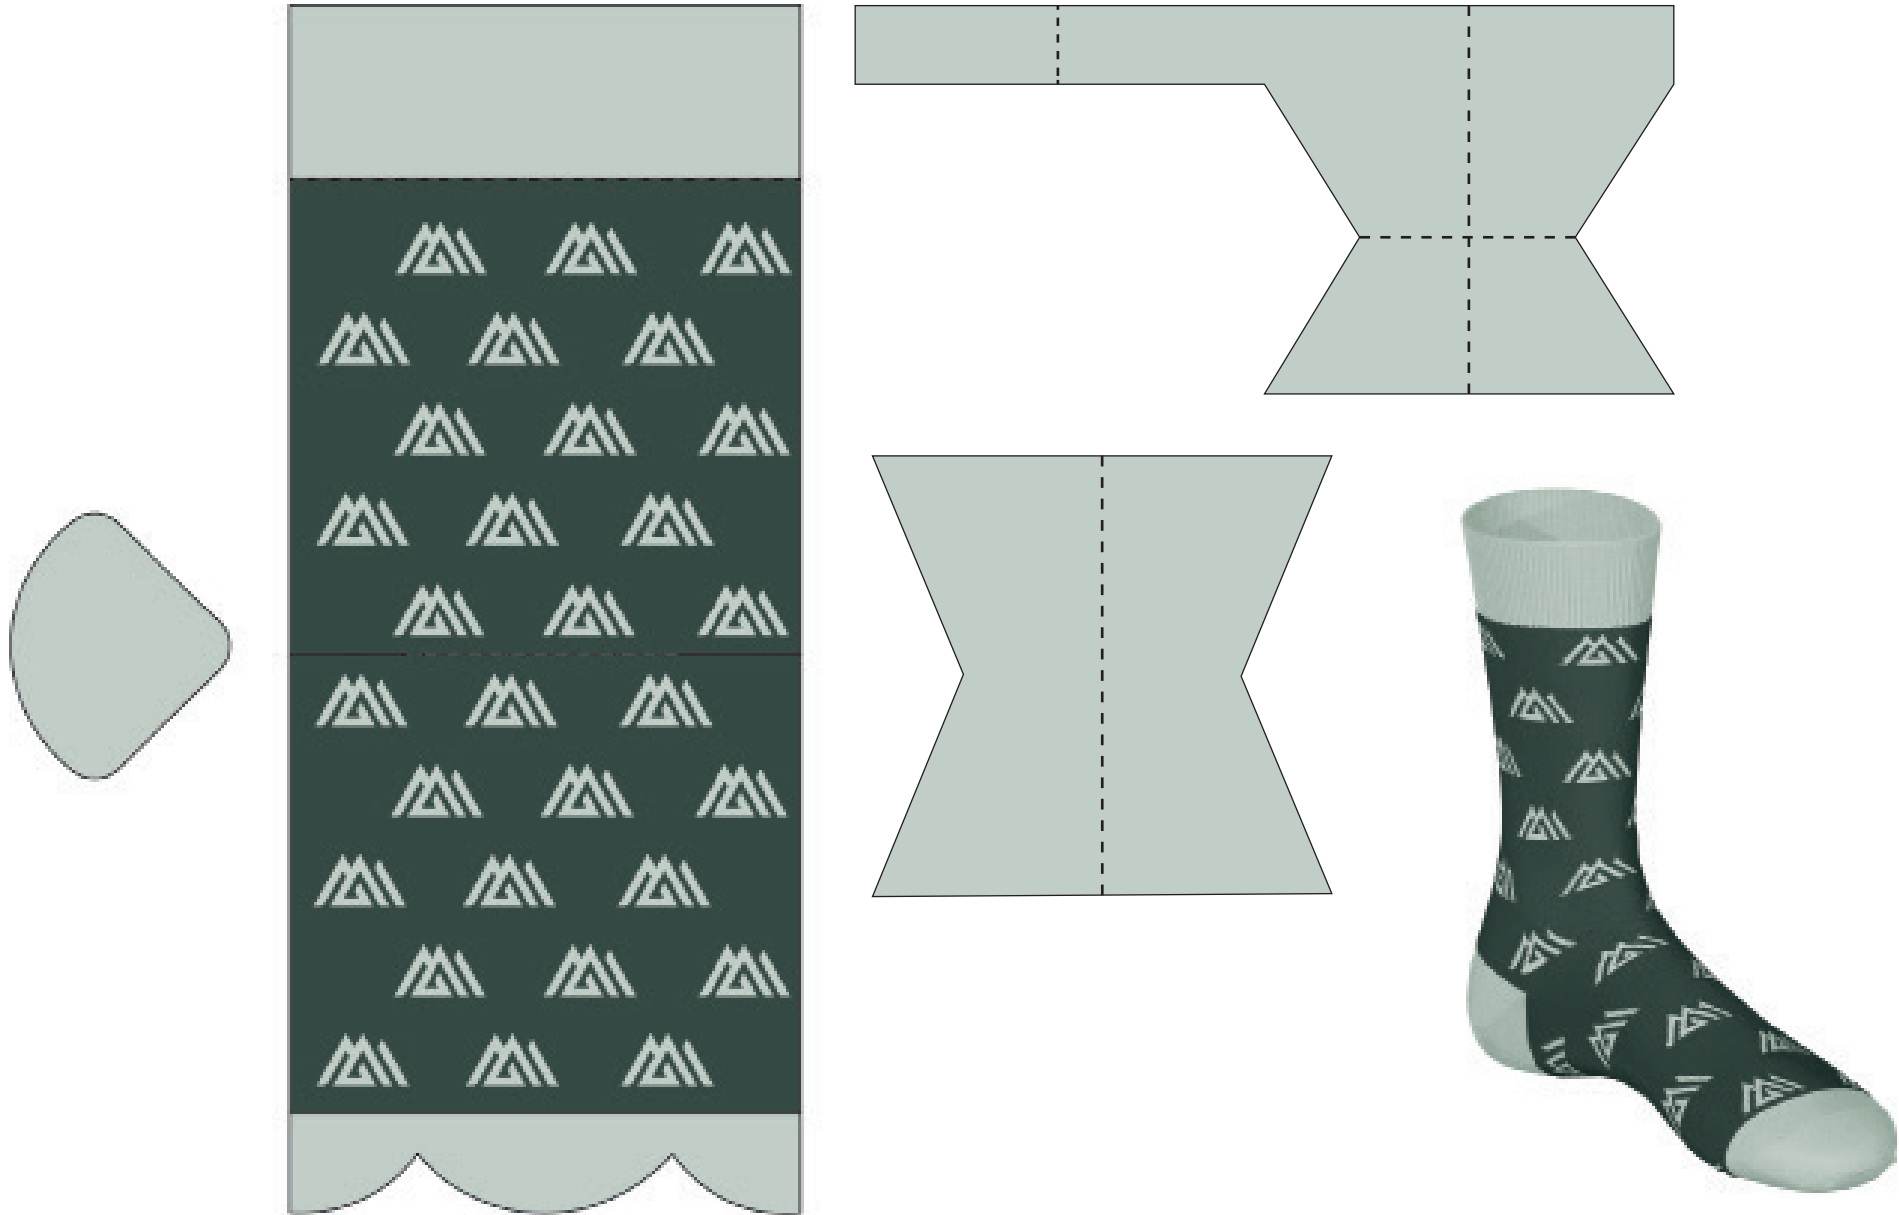

What is important to keep in mind is that you can use a maximum of five colors per sock. No designs can be applied on the heel or toe areas. For these parts, you can only choose a solid color. If no color is specified, we will default to white.

The rest of the sock can be used for your desired design. Please make sure the design is not too small, so it remains clearly visible.

Next to this, you will find an example of how the template works. If you have any questions after reading this explanation, feel free to contact us at 0793690159 or email us at [sales@wendelfred.nl](mailto:sales@wendelfred.nl).

Here is an example of what the final result will look like.

Here you will find the templates you can use to submit your design.
